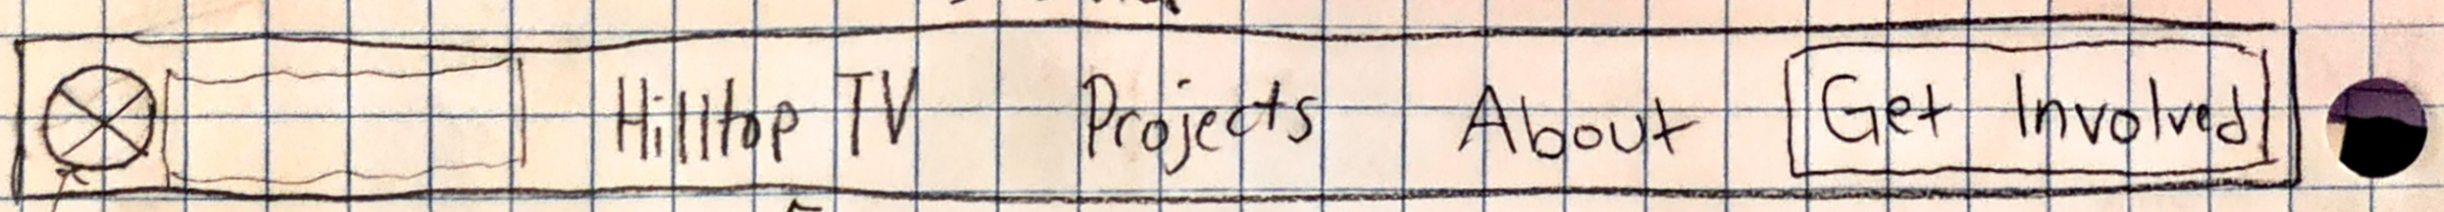
Navbar Sketch

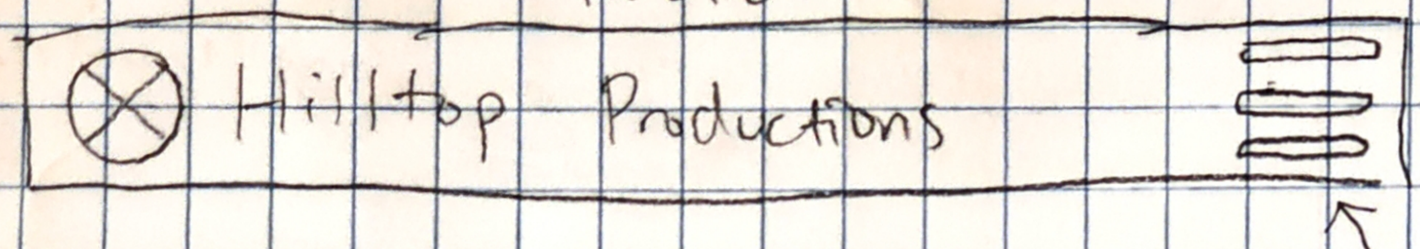
Desktop



↖ dropdown on hover

logo - display the text version if sufficient space horizontally

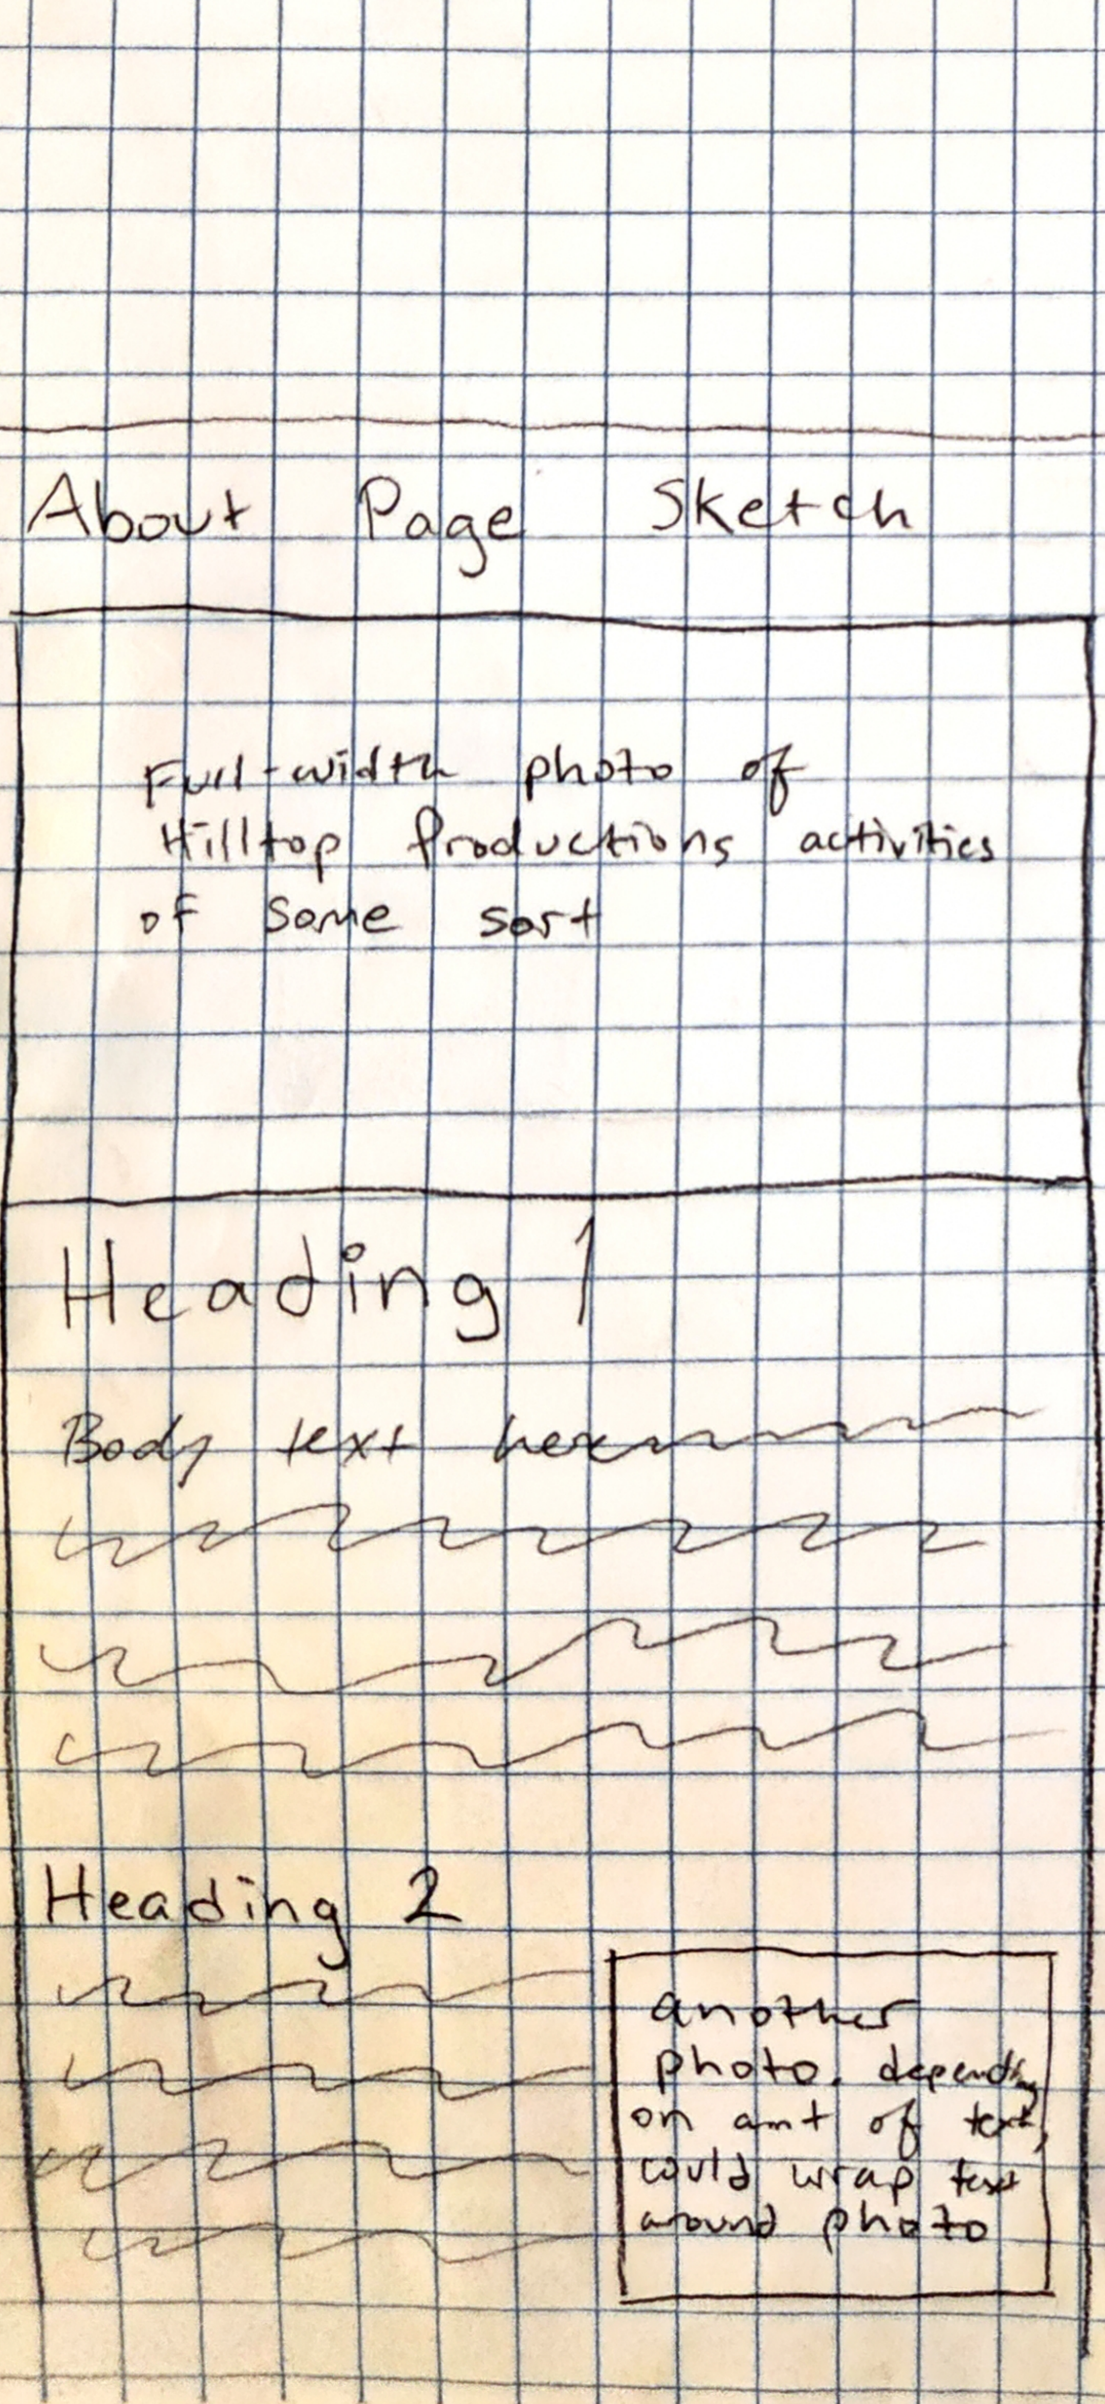
Tablet



Mobile

Hamburger button makes menu appear on top (ideally dims the content behind menu)

About Page Sketch



Mobile ver.

Desktop likely similar, just w/ margins & the banner photo may need adjustment

On-Demand Page Template

Image carousel w/ top-rated/viewed content posted to the cashrs VOD site. May need to set up an API or smth to fetch this info

← Alternatively, as a backup, can just put some BTS pics from the various shows if I don't have time

Heading 1

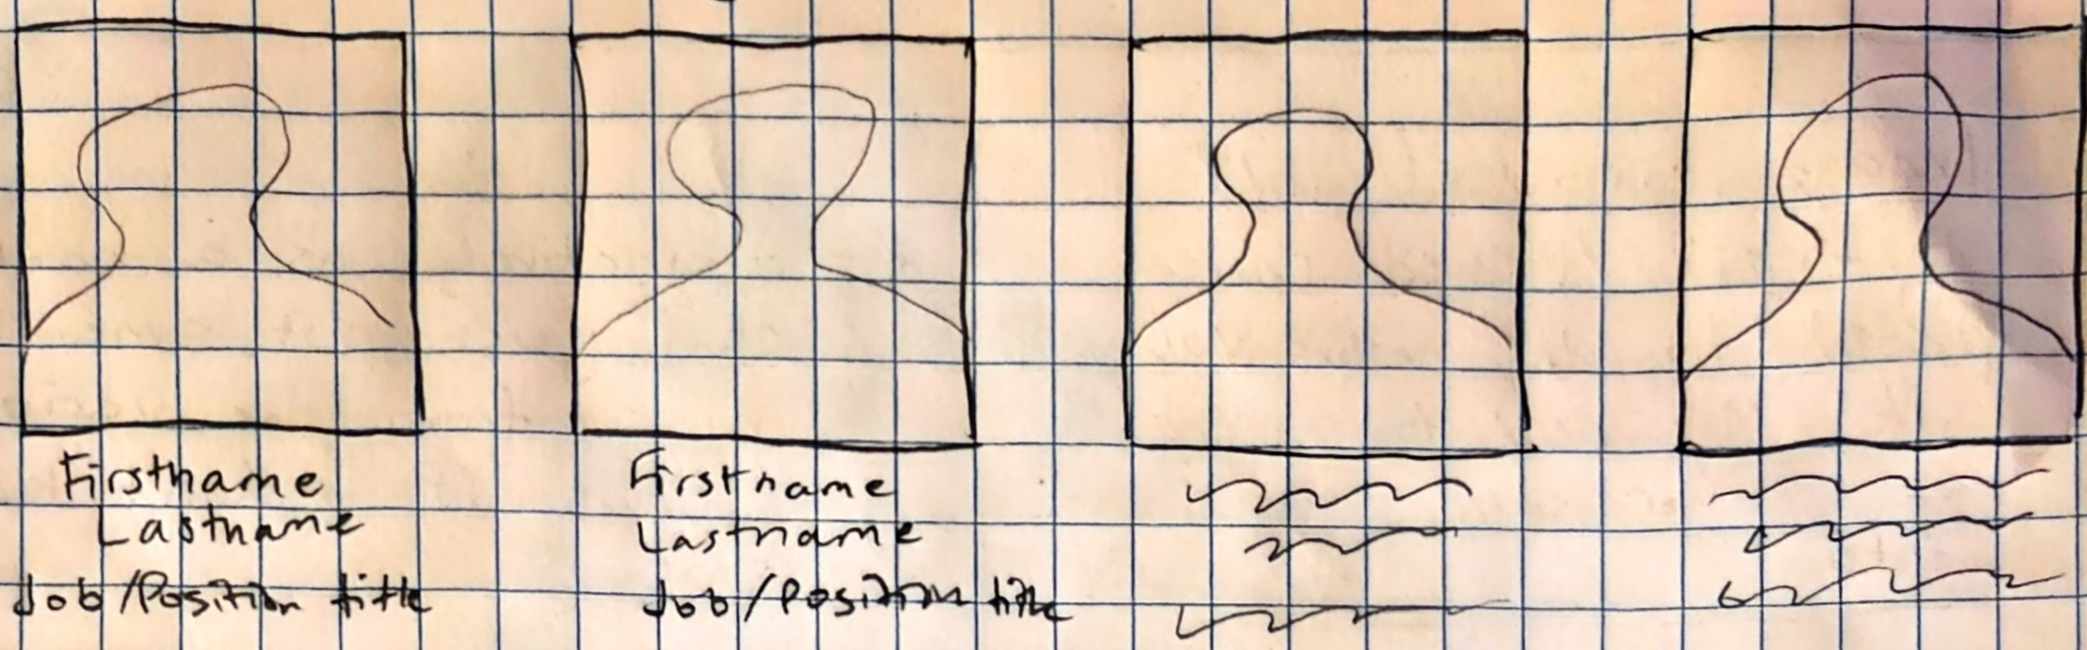
Short description of Hilltop TV

BTS photo

Heading 2 (category) description

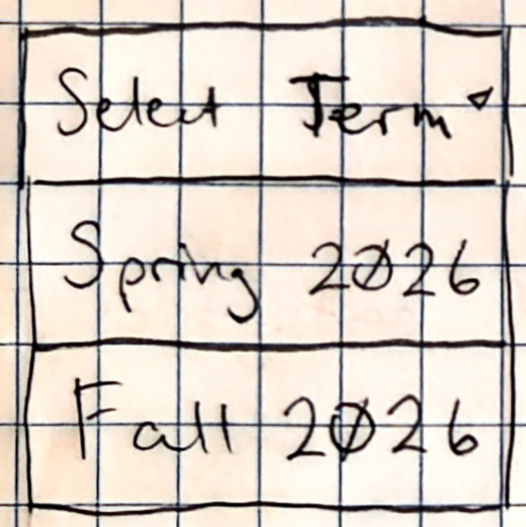
★ order of categories TBD

Staff Listings



Number of entries in grid will vary based on device width

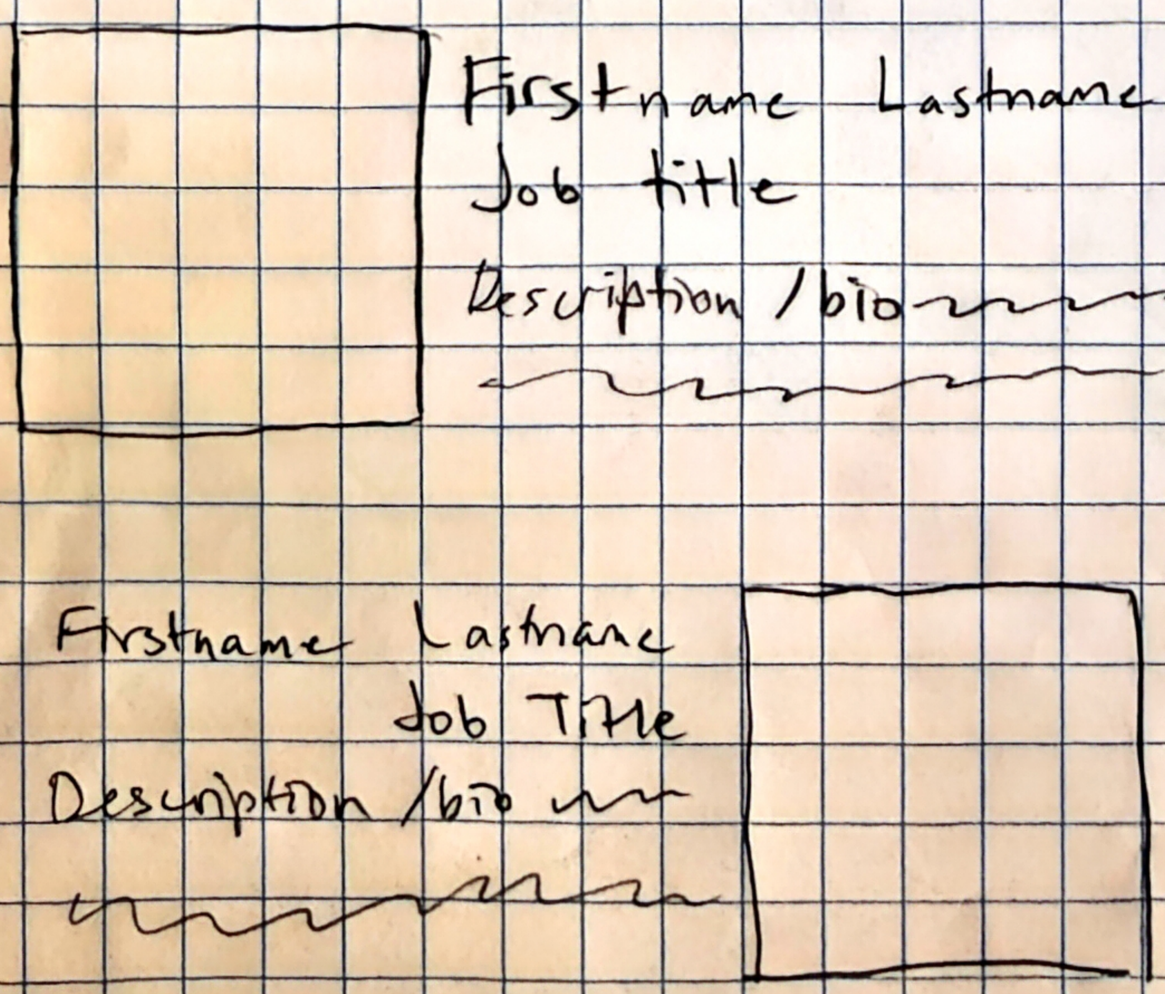
Would also like to include a dropdown selection @ the top to choose which semester's staff to display



On clicking a staff portrait, perhaps it flips over to display either a bio or a short description of the job the staff member holds.

Have the images lift up slightly on hover to indicate interactability

To make it simpler on mobile, perhaps display as such:



Alternate sides with the photo for more visual interest since we won't have the CSS animations to add that here.

Use the same dropdown selection on both mobile & larger screens.

May need to consider a third layout for use on tablets due to the presence of a touch screen while having a wider screen than a mobile phone.
